

Capture the Flag 2: Widgets

Goal: Turn the single-card application into a simple multi-section interface.

🚩 Flag 0 – Create Your Feature Branch

Objective: Create a feature branch before modifying your application. Name the branch `feature/widgets`

Screenshot:

- Terminal showing `feature/widgets`

```

C:\Users\Ninja Turtle\Documents\binsoy\IT314AB_Rebese\my_first_flutter_app>git branch
* main

C:\Users\Ninja Turtle\Documents\binsoy\IT314AB_Rebese\my_first_flutter_app>git checkout -b feature/widgets
Switched to a new branch 'feature/widgets'

C:\Users\Ninja Turtle\Documents\binsoy\IT314AB_Rebese\my_first_flutter_app>git branch
* feature/widgets
  main

C:\Users\Ninja Turtle\Documents\binsoy\IT314AB_Rebese\my_first_flutter_app>

```

🚩 Flag 1 – Break It Apart

Objective: Separate your profile information into individual `Text` widgets.

If your card currently looks like this:

```
Text(  
  'Chiara Marie C. Canque\n'  
  'BSIT - 3\n'  
  'My First Flutter Application\n'  
  'August 11, 2026',  
)
```

Your task: Separate each piece of information into its own `Text` widget.

You should have something conceptually like:

`Text → Name`

`Text → Course & Section`

`Text → Application Title`

`Text → Date`

Do not worry about making it pretty yet.

Screenshot:

- Your code showing the separate `Text` widgets
- Your application

🚩 Flag 2 – Stack the Information

Objective: Arrange your individual `Text` widgets vertically.

Research how to use:

`Column()`

Place your information inside the `Column`.

Your card should now have:

Name

Course & Section

Application Title

Date

Screenshot:

- The `Column` in your code
- The four separate pieces of information displayed vertically

🚩 Flag 3 – Add Another Element

Objective: Add another individual widget to your `Column`.

Add something that belongs to your profile.

Examples:

Hobby

It must be its **own widget**, not additional text inside another **Text**.

Screenshot:

- New widget in your **Column**
- Updated application

🚩 Flag 4 – Put Two Things Side-by-Side

Objective: Discover the **Row** widget.

Create a new section containing **two pieces of information beside each other**.

For example:

Age: 21 Birthdate: August 11, 2003

Research:

Row()

Place the Row inside your existing Column.

Your structure should now resemble:

Column

└─ Text

└─ Text

└─ Text

└─ Text

└─ Text

└─ Row

└─ Text

└─ Text

Screenshot:

- Your widget structure/code
- The two items displayed side-by-side

🚩 Flag 5 – Give It Some Space

Objective: Improve the spacing between your widgets.

Research:

`SizedBox()`

Add appropriate spacing between your:

- Image
- Name
- Course
- Other information
- Row

Challenge: Make the card easier to read **without changing its colors or fonts yet.**

Screenshot:

- `SizedBox` usage
- Updated application

🚩 Flag 6 – Make It Look Better

Objective: Apply styling to your individual widgets.

Now that your information is properly separated and positioned, improve the visual hierarchy.

Research how to modify:

`TextStyle()`

Apply different styling to at least **three** elements.

For example:

- Name → larger and bold

- Course → medium size
- Date → smaller
- Application title → italic

Screenshot:

- Your `TextStyle` changes
- Updated application

🚩 Flag 7 – Improve the Layout

Objective: Control the alignment of your widgets.

Research the properties of `Column` and `Row`.

Experiment with:

`mainAxisAlignment`

`crossAxisAlignment`

Change the alignment of your content so the card looks intentional rather than simply stacked.

Screenshot:

- The properties you changed
- Updated application

Flag 8 – Create a Second Card

Objective: Apply what you learned to create another section.

Create a second **Card** containing something different from your profile.

For example:

My Favorites

Favorite Game

Favorite Food

Favorite Movie

The second card should also use:

- Individual **Text** widgets
- A **Column**
- At least one **Row**
- Spacing

Screenshot:

- Code for the second card
- Both cards displayed

🚩 Flag 9 – Stack the Cards

Objective: Arrange your two cards vertically.

You now have:

Profile Card

Favorites Card

Research how to place **multiple widgets inside the Flutter body**.

Use a layout widget to arrange your two cards vertically.

Screenshot:

- The widget containing both Cards
- Both cards visible in the application

🚩 Flag 10 – Widget Discovery

Objective: Discover a Flutter widget independently.

Research the Flutter widget catalog and find **one widget you haven't used yet**.

Examples:

- Icon
- Divider
- CircleAvatar
- Chip

- **ElevatedButton**

Add it somewhere appropriate in your application.

Screenshot:

- Your newly discovered widget in the code
- The widget visible in the application

🚩 Flag 11 – Real Phone Test 📱

Objective: Run your completed application on a **physical** Android phone.

Research how to run Flutter on your phone.

Screenshot:

- Your completed application running on the physical phone (screenshot from your actual phone)

BSIT 3

My First Flutter Application

August 11, 2026

Hobby: Lazing

Age: 22

Birthdate: December 23, 2003

RIGHT OVERFLOWED BY 13 PIXELS

My Favorites

Favorite Game: Mobile Legends

Favorite Food: Her

Favorite Movie: The Grudge

Game: ML, Dota2, Valorant Food: Adobo

Flag 12 – Save Your Progress

Objective: Commit your completed Widget branch.

Follow proper standards of commit messages

Screenshot:

- Successful commit
- `feature/widgets` branch
